

*The graph above shows the actual ecological flow data-the amount of water left to the Paravani River from Paravani HEPP- for November 2015. The minimum permitted ecological flow of Paravani HEPP is 1,75 m<sup>3</sup>/sec.*

*The increased flow for the dates 12<sup>th</sup> of November and 19<sup>th</sup> of November was due to stops at generation, when no water was drawn to intake.*
